

Business owners typically have four questions they consider prior to purchase:

- » Will this purchase affect my personal credit?
- » What is the best option to maximize my tax advantages and monthly cost?
- » Am I personally liable if an employee of my company is involved in an accident?
- » What options do I have to protect myself?

To alleviate these questions, Chrysler Capital Small Business Auto offers true Small Business Auto finance options for dealers and business customers. These options provide flexibility for all types of businesses whether the company is established or just getting started.
