TradesPRO™ | Premier
TradesPRO™

Monroe TradesPRO™ | Premier

Durable | Reliable | Versatile

Maximize your capabilities with best-in-class storage, increased payload and corrosion resistance, and towing and hauling - all in a single truck.

BENEFITS

- Aluminum body offers higher payload for contractors
- Designed to store every tool and piece of equipment a contractor needs
- Storage boxes offer easy access to tools

INDUSTRY APPLICATIONS

Construction

General
Contracting

“The TradesPRO AL is a versatile body that works for several industries. The weight savings of the aluminum construction gives the customer more payload capacity and the fold down sides makes this body a must have for your fleet.”

Scott Yassinger, Fleet & Commercial Sales Director of Raymond Chevrolet - Antioch

What To Expect From Monroe

Our proven process gets you what you need, when you need it.

Design

Our experienced team of engineers consistently improves and evolves the design of our truck equipment. Customized orders start here. Engineering works to incorporate the exact truck and equipment specifications you need to succeed.

Manufacturing

We utilize best-in-class manufacturing equipment, resilient American-made materials, robotic automation solutions and our skillful team to create our performance-driven work trucks.

Installation

During installation, we adhere to the highest industry standards for mechanical assemblies, electrical and wiring, hydraulics and control systems, and of course safety.

Quality Assurance

After all elements are installed, every vehicle is subjected to bumper-to-bumper inspection so that our customers and end-users can worry less and work more, for a confident and profitable investment.

Distribution

Monroe Truck Equipment uses personal delivery drivers for orders that are close to our manufacturing locations, ensuring attentive delivery and personalized service whenever we are able.

Nationwide Ship Thru

When applicable, Monroe Truck Equipment utilizes our vast distribution network system to ship work trucks for customers across the country. This efficient system is in place so you can find and get the right truck without excessive wait or hassle.

Designed with Customers in Mind

By putting ourselves in the drivers' seat, we deeply understand your challenges and how to solve them.

Engineering Expertise

Monroe Truck Equipment has a 13 person engineering team responsible for designing our work trucks and ensuring the safety and ease of use for all of our equipment. Backed by decades of experience in the industry, our team understands how to design builds that best benefit our customers.

Engineering Approach to Customization

Our experienced engineers have worked with hundreds of customers throughout the decades, honing their skills on creating customized work truck solutions that will help our customers succeed. Not only does our team safely incorporate custom features, they make sure every aspect is efficient to use and operate.

Benefit to Customers

Our customers have come to expect that our team of engineers will create a work truck that is easy to operate, simple to maintain and will last for years to come. Due in part to the skill of our engineering team, Monroe Truck Equipment is able to offer one of the industries best warranties.

Long Term Industry Leaders

Backed by our skillfully designed and manufactured products, we work to establish a long term relationship of trust with customers. As leaders in our industry, we provide high-performance solutions that move communities forward.
