Improve material flow and handling with the TGS Vibrator Kit. This kit reduces material flow issues and increases your efficiency and profitability. (Not recommended for TGS 300.)

### MATERIAL SAVER SYSTEM

Eliminate material flow when the spreader is not in use. Intended for fine deicers that are prone to leaking. (Standard on TGS 300; optional on TGS 600 and TGS 1100. Not available on TGS 800.)

## FORGE®

### TARP

Protect spreading material from the elements with a vinyl-coated polyester tarp and bungee tie-downs. (Optional on FORGE® models.)

## WORK LIGHT KIT

Increase visibility of the spreader when plowing at night. The FORGE® work light kit includes two headlights and all hardware and wiring to activate lights from inside the cab or at the rear of the spreader. (LED kit available as well as halogen.)

### HOPPER SPILL GUARDS

Protect the bed of the truck from salt spills when filling FORGE® 1.0 and 1.5 spreaders. Spill guards widen the top width of the spreader, making loading with loader buckets easier. (Excludes FORGE® 2.0 Long Bed.)

### HOPPER EXTENSION KIT

Add additional capacity to your FORGE® spreader by adding a FORGE® Extension Kit. Increase material capacity by a full ½ yard by adding these easy-to-install Stainless Steel Extensions.
